

I can hardly believe that this issue is being brought to such extremes. The traffic and weather reporting on XM radio is part of the service that I pay for on a monthly basis and have come to expect. Local radio stations provide reports on traffic and weather when it suits them, not necessarily when I need it. Part of the reason I choose to pay for radio services is to gain access to music and information at my convenience. To limit this is simply unacceptable. I sincerely hope that this petition is not carried through. It would be a disgrace. I would like to add that I still do listen to local stations quite often, however again, it is at my convenience. Allowing XM and other pay radio services to air traffic and weather reporting should not impact local stations financially and to suggest that it will is laughable. I strongly urge that this petition be recanted. Thank you.
